HOSTING WEBSITE

Will have mySQL database for your projects, which you would need for setting up a CMS (content management system site) like WordPress

A BIT ABOUT WORDPRESS

The screenshot shows the WordPress dashboard for a user named Mira Alibek. The interface includes a top navigation bar with a home icon, the user's name, a refresh button, a 'New' button, and the site name 'Kalium'. On the right of the top bar are 'Screen Options' and 'Help' dropdowns. A left sidebar contains a menu with items like Dashboard, Home, Updates (23), Laborator, Posts, Portfolio, Media, Pages, Contact, Appearance, Plugins (17), Users, Tools, Visual Composer, Settings, Custom Fields, LayerSlider WP, Slider Revolution, All Import, Custom CSS, Master Slider, and a Collapse menu button. The main content area features a notification about WordPress 5.3, a 'Dashboard' title, and a message about Post Types Order. Below this is a 'Welcome to WordPress!' section with links to 'Get Started', 'Next Steps', and 'More Actions'. The 'At a Glance' widget shows 20 Posts, 42 Pages, and 20 Portfolio items, along with the current WordPress version (4.9.12) and theme (Kalium). The 'Quick Draft' widget has fields for Title and content, with a 'Save Draft' button. The 'Activity' widget lists recently published posts with their dates and titles. The 'WordPress Events and News' widget at the bottom promotes an upcoming event.
